Question 1 Choose the correct answer from the following options:

1- Most cells are

- A- Large B- very small C- small D- very large

2- Common plant or animal cells are between..... long:

- A- 0.005 and 0.01mm B- 0.005 and 0.15mm C- 0.05 and 0.1 mm D- 0.005 and 0.1 mm

3- An unfertilized bird egg containscell:

- A- four eggs B- only one egg C- two eggs D- three eggs

4- The unaided human eye can see objects that are aboutmillimeters (mm) long

- A- 0.1 B- 0.01 C- 0.5 D- 0.05

5- Living organisms grow and reproduce by increasing the number of cells.

- A- True B- False

6- All new cells come from new cells.

- A- True B- False

7- Living organisms are classified according to.....

- A- the size of cells B- the color of cells C- the number of cells into

8- Unicellular organisms are organisms made up of.....:

- A- only one cell B- more than one cell

9- All cells consist of a cell membrane

- A- True B- False

10- All cells have a nucleus

- A- True B- False

11- The cell is astructure that carries out all its own life activities.

- A- simple B- complex C- very simple

12 - The basic needs of a cell are similar to the needs of all organisms

- A- True B- False

13- Too much water enters the cell. The cell

- A- size will decrease B- size will increase C- will swell until it bursts

14- The..... is the smallest building unit in our body

A- cell

B- Neuron

C- Body organ

15- The cells of plants and animals are different in

A- shape

B- size

C- color

D- shape and size

Question 2

Choose from the column (A) the appropriate number from the column (B):

| Column (A) | | Column (B) | |
|----------------|-------|------------|---|
| waste products | | 1 | Both plants and animals are living organisms made of |
| Microscope | | 2 | The basic needs of a cell are similar to the needs of all organisms, such as..... |
| cells | | 3 | Cells have a way of releasing |
| Water | | 4 | A device used to see very small cell |

Question 3

Give a reason

- the cell membrane is very important for cells
- Cells are important.

Question 1 Choose the correct answer from the following options:

1- Most cells are

A- Large B- **very small** C- small D- very large

2- Common plant or animal cells are between..... long:

A- 0.005 and 0.01mm B- 0.005 and 0.15mm C- 0.05 and 0.1 mm D- **0.005 and 0.1 mm**

3- An unfertilized bird egg containscell:

A- four eggs B- **only one egg** C- two eggs D- three eggs

4- The unaided human eye can see objects that are aboutmillimeters (mm) long:

A- **0.1** B- 0.01 C- 0.5 D- 0.05

5- Living organisms grow and reproduce by increasing the number of cells.

A- **True** B- False

6- All new cells come from new cells.

A- True B- **False**

7- Living organisms are classified according to.....:

A- the **size of cells** B- the color of cells C- **the number of cells into**

8- Unicellular organisms are organisms made up of.....:

A- **only one cell** B- more than one cell

9- All cells consist of a cell membrane

A- **True** B- False

10- all cells have a nucleus

A- True B- **False**

11- The cell is astructure that carries out all its own life activities.

A- simple B- **complex** C- very simple

12 - The basic needs of a cell are similar to the needs of all organisms

A- **True** B- False

13- Too much water enters the cell. The cell

A- size will decrease B- size will increase C- will **swell until it bursts**

14- The..... is the smallest building unit in our body :

A- **cell**

B- Neuron

C- Body organ

15- The cells of plants and animals are different in

A- shape

B- size

C- color

D- **shape and size**

Question 2

Choose from the column (A) the appropriate number from the column (B):

| Column (A) | |
|----------------|---|
| waste products | 3 |
| Microscope | 4 |
| cells | 1 |
| Water | 2 |

| Column (B) | |
|------------|---|
| 1 | Both plants and animals are living organisms made of |
| 2 | The basic needs of a cell are similar to the needs of all organisms, such as..... |
| 3 | Cells have a way of releasing |
| 4 | A device used to see very small cell |

Question 3

Give a reason

- The cell membrane is very important for cells

B because it controls (regulates) which substances can enter or leave the cell.

- Cells are important.

Because cells carry out all the functions that organisms need to live, such as:

1. Growing 2. Repairing themselves 3. Reproducing
