Section C: Reading Comprehension Q16–Q20 — 5 marks

Read the following passage and answer questions 16–20:

When we see someone for the first time, our brains instantly notice things like their age, hair, eye and skin colour, or height and voice. We use this information to make assumptions about their education, social position and character. Without realising it, we then make important decisions — such as who to vote for, who to give a job to, or who to trust — based on these assumptions. The way we dress also has an impact in situations such as school, social occasions or work. We often look up to someone who is very well-dressed and look down on those who don't dress as smartly. The clothes we wear don't just affect what others think of us; they also affect how we feel about ourselves.

16. According to the passage, what do our brains notice first about a new person?

- a -Their fashion sense b- Physical features like age, hair, and height
c -Their job and education d -Their personality

17. The phrase 'look up to' in the passage means:

- a- look at someone from below b- search for information about someone
c- admire and respect someone d- ignore someone

18. Based on the passage, our clothes affect:

- a- only what others think of us b- only how we feel about ourselves
c- both what others think of us AND how we feel d- neither — clothes are not important

19. 19. The word 'assumptions' in the first paragraph is closest in meaning to:

- a- facts based on evidence b- beliefs formed without proof
c- scientific conclusions d- personal preferences

20. 20. What is the MAIN idea of the second paragraph?

- a- Smart clothing guarantees success b- Dressing well is more important than being educated
c- The way we dress influences both social interactions and self-perception
d- People who wear uniforms are more trustworthy
